

This website, my complete CV and professional work history was completed within a week. I made it with love and JS. Thanks to the power of the latest HTML5 standards, I was able to animate it with simple lines of code.

This website can be found on [GitHub](#). Below you will find a list of the JS libraries I used to build the site:

- [Backbone.js](#)
- [Paper.js](#)
- [D3.js](#)
